

Tavik Travertine Cylinder Wall Sconce

Installation & Care Guide — AIR HAVEN

SAFETY NOTICE: This is a hardwired lighting fixture. Installation should be performed by a qualified, licensed electrician in accordance with local electrical codes. Disconnect power at the circuit breaker and verify with a voltage tester before beginning any work.

Installation Steps

This is a hardwired fixture and should be installed by a qualified, licensed electrician in accordance with local electrical codes, with power disconnected at the breaker before work begins.

1. Turn off power to the circuit at the breaker box and verify with a voltage tester.
2. Mount the wall-junction bracket to the electrical box, using hardware appropriate for your wall type.
3. Connect the fixture's wiring to the household wiring (ground, neutral, and live) inside the junction box.
4. Attach the fixture body to the bracket so it sits flush against the wall.
5. Because the LED light source is integrated into this fixture, no separate bulb installation step is needed.
6. Install the bulb(s), then restore power at the breaker and test the fixture.

Care & Maintenance

Natural stone needs gentler care than painted or metal finishes — avoid acidic or abrasive cleaners, which can etch or dull the stone surface over time.

- Turn off power before cleaning.
- Dust the stone shade with a soft, dry cloth.
- Avoid harsh acidic or abrasive cleaners on the travertine or alabaster surface.
- Wipe a wood base with a dry cloth only; avoid household wood polishes unless confirmed compatible.
